### **The Simple Solution to Toyota 1KD White Smoke On Start-up ...**

The D4D, sorry, 1KD-FTV is not immune to seizing, even though it's 99 percent avoidable if you know where to look. The problem is caused by the oil pick-up in the sump becoming choked up with carbon and debris, restricting the flow of oil, thus destroying any chance of the motor getting the vital lubrication it so rightfully deserves.

### **Toyota Hilux Prado 1KD engine piston failure explained, hole cracked etc**

In affected vehicles, piston cracking is most common between 100,000 km and 150,000 km. Issued in September 2014 by Toyota, Technical Service Bulletin EG-008T-0112 acknowledged the problem of cracked pistons for the Euro IV 1KD-FTV engine. Symptoms of a cracked piston include: A sudden, strong knocking noise from the engine;

### **1KD-FTV Toyota engine - AustralianCar.Reviews**

How do you figure you might say, well it's a common problem in the Hiace van fitted with the 1KD-FTV, enclosed engine bay, heat builds up especially around the turbo, and this leads to a failure with the solenoid (electronics) that controls the vane turbine which in turn leads to no power.

### **Recalls and faults: Toyota 150 Landcruiser Prado (2009-on)**

While generally well-known in the mechanic community, consumers should be aware that Toyota 1KD engines have a very specific problem. 'The 1KD white smoke on start-up, besides the obvious white smoke is symptoms of rattling / knocking noise in the first two or three seconds after start up. The issue may clear up quite quickly and then dissipate, until the engine runs perfectly and no further issue is presented. It can also be noted as 'when I park nose down' symptom.

The 1KD engine produces 17% more power with 11% less fuel consumption than its predecessor, the 1KZ engine. This engine was first used in Toyota Land Cruiser Prado, third Generation Hilux Surf and now used in the Toyota Fortuner, Hiace and Toyota Hilux. 2KD-FTV.

### **1KD-FTV**

The 1kd- ftv is a superb crd engine, early ones did have injector problems. Injector failure is a reason oft cited due to poor diesel quality. In other countries inc.UK, the injectors failed in early engines, excess sulphur is not a problem in the diesel there. The common rail was redesigned by Toyota, as the early failures were due to a design fault.
