My own Expedition also calls for 14 ounces of PAG 46. I always pull a vacuum and suck the oil in--it works wonders on split systems. After I spilled the oil from my compressor, I put the rest of one bottle a d an entire second bottle of pag oil in the system. It's been running a couple months now. Yes most of the oil stays in the components.

Charging the AC on a 1997-2002 Ford Expedition/F150

Generally speaking, air-conditioning problems in Ford vehicles have their roots in two specific systems: the air management aystem and the refrigerant cycling system. The air management aystem is the first which should be checked, because some of the problems are relatively simple to diagnose.

2000 Expedition Ac System

As your 2000 Ford Expedition ages, the air conditioning unit will gradually lose its ability to cool the cabin of the vehicle. This is most often because the air conditioner unit needs to be recharged with refrigerant. The refrigerant cools the air that the blower forces into the vehicle.

Where is the ac low pressure port located on a 2000 ...

This is my first post here at the Expedition owners forum. I'm in need of some help. My 2000 Expedition has no A/C at all, not in any of the front vents (blows warm air) OR the rear vents. I verified that the A/C compressor does turn on and run when I turn on 'max ac' on the electronic controls in the dash.
