(And of course, Fuzzy's eyebrows were inspired by the Bone characters!) The Bone series is one of my all time favourite comics, and the final two volumes were released while I was working on the first two years of S&F. So it was very much at the forefront of my mind at the time. Anyhoo, come back on Monday for our next comic, team! -Sam Logan.

Fuzzy logic differs from classical logic in that statements are no longer black or white, true or false, on or off. In traditional logic an object takes on a value of either zero or one. In fuzzy logic, a statement can assume any real value between 0 and 1, representing the degree to which an element belongs to a given set. What is Fuzzy Logic?
