Sample Android Apps · codepath/android_guides Wiki · GitHub

If you are new to Android, see Building your first Android app for beginners. Open the sample project. This quickstart uses Sceneform, a 3D framework for that makes it easy for Java developers to build ARCore apps without OpenGL. To use ARCore in your app without Sceneform, review the Enable ARCore documentation.

Android Projects Documentation - 1000 Projects

A product requirements document (PRD), fully defines the value and purpose of a mobile app to your product and development teams. This document is the foundation of a successful product, outlining business logic, listing technical specifications, and ultimately helping your development team transform your early concept into a fully functional app.

Quick start: Run a sample Android app with the Google Pay API

Why write requirements? Well, let's imagine you want to produce a mobile app, but you don't have the programming skills. So, you find a developer who can build the app for you, and you describe the idea to him. Surprisingly, when he showcases the app for the first time, you see that it is not exactly what you want. Why? Because you didn't provide enough detail when describing the idea.

Quickstart for Android | ARCore | Google Developers

Documentation for the MapQuest Android Search Ahead SDK. Search Ahead is a spatially-aware predictive search engine most commonly used to implement 'type ahead' or autocomplete-like functionality within an application, to provide a list of suggestions to the user that refreshes as the user is typing.

Android App Documentation Sample

Poor app performance can ruin the user experience and destroy your app's reputation. If it ever responds slowly, shows choppy animations, freezes, crashes, or consumes a lot of power, your users will notice. To avoid these performance problems, use the Android Profiler to measure your app's memory, CPU, and network usage.
