Animal Architects: Building and the Evolution of ...

Beavers Beavers might be the most well-known animal architects, and with good reason. These prolific builders fell trees and gather sticks and mud to construct dams, which create ponds that offer predator protection and easy access to food during the winter. A beaver drags a log at a pond in Denali National Park and Preserve in Alaska.

Home - Animal Arts

Designing for animals has always seemed to fascinate architects. Take, for instance, Cedric Price, with his bird aviary, Norman Foster's elephant house, or, recently, BIG's cage free zoo that will turn the tables on classical human-animal zoo relations.

Beaver Dam Yes, beavers are perhaps the most famous animal architects, and rightfully so. They fell huge trees to create dams, which they build to create still ponds where they can construct their...

Structures built by animals - Wikipedia

Animals, like plants, are one of the major elements of urban ecosystem. Contamination of environment, building's modernization and reducing of city greenery make however significant decline in number of animal species in built-up areas.

Animal Architects Building And The

Animal Architects masterfully investigates how the structure an animal builds reveals the inner workings of its mind. Beginning with instinct and the simple homes of solitary insects, and progressing to conditioning, the "cognitive map," and the role of planning and insight, James and Carol Gould use the amazing engineering feats throughout the animal world to reach fascinating conclusions about animals' behavioral capabilities.

Amazing Animal Architects - Ingenious Insect Engineering

Planning and Building an Animal Shelter An animal shelter is the physical nucleus of a community animal care and control program, and should be constructed, maintained, and operated so that it is attractive and convenient to the community. Above all, an animal shelter must be a place of security and comfort for the animals sheltered there.

Animal Arts | Architecture - Animals - People | Page 23

When writing a book on the evolution of intelligence, insects might not be the obvious topic to start with, except perhaps as a counterexample. However, I think Gould and Gould (who I'll refer to as G2 from now on) might be onto a good idea here. Because really, it's kind of like any other complex ...
