## **Yagi-Uda antenna - Wikipedia**

A Yagi-Uda antenna or simply Yagi antenna, is a directional antenna consisting of two or more parallel resonant antenna elements in an end-fire array; these elements are most often metal rods acting as half-wave dipoles.

Yagi-Uda antennas

restricting the transmission of energy

to one

direction. Without the physical constraint of a

waveguide, wave intensities decrease

according to the

inverse square law as they expand into three dimensional space..

There are different types of waveguides for different types of waves.
