Bird Beak Lab by Jessica Filpo on Prezi

Bird Beak Adaptation Lab Objectives:
Students will: 1.) Comprehend that birds
have physically adapted in relation to
their type of food supply. 2.) Deduce
what beaks are most efficient for given
foods by experimenting with imitation
beaks and given food sources. 3.) Learn
the importance of multiple trials. 4.)
Represent their data with a bar graph.

Bird Characteristics Adaptation Lab . The place in which a bird lives supplies the animal with food. Using each of the birds mentioned, determine, as closely as possible, the type of area in which they live. Answer the following questions completely based on what you know about birds. 1. What are some of the foods the birds in the pictures ...

BIRD BEAK LAB - WFISD

Introduction: How are bird beaks adapted to the foods they eat? In this lab, we will simulate a scramble competition (kind of like in the old kids' game, "Hungry, hungry hippos") between six species of birds in six different environments. Each bird has a different beak type (spoonbill, tweezerbeak, tongbeak, etc.) and you will find that depending on the food available, some will do better than ...
