Multiple bits. Multiple bits may be expressed and represented in several ways. For convenience of representing commonly reoccurring groups of bits in information technology, several units of information have traditionally been used. The most common is the unit byte, coined by Werner Buchholz in June 1956, which historically was used to represent the group of bits used to encode a single ...

Byte - Wikipedia
This unit is based on the work of Richard Skemp. His ideas of teaching fractions have been used with students from year 2 to year 8 with considerable success. Skemp's use of the word 'parts' is deliberate in that he uses it to refer to 'equal parts' whereas bits refers to non equal parts. Concepts to be developed are: The whole of an ...
