to Cadillac engines.

Cadillac V8 engine - Wikipedia

The whole idea behind these large displacement engines was to allow for drivability found in 60's cars with pollution equipment and lower compression. The 472/500/425/368 all are very under taxed. They don't make a lot of soup for their size when compared to some other stuff. The power that they make is suitable for moving a heavy car.

Cadillac High Performance

Cadillac was the first automobile maker in the world to mass-produce V8 engines. [citation needed] The company has produced many generations and variations of V8s since 1914. In 2010, when the Northstar engine series ended production, it became the last General Motors division to retain its own proprietary V8 design.
