### grade 10 academic Chapter 6 Review Quiz Answers may 9th 2011

428 Chapter 6 Ratios If we multiply the rate by some factor  $c$ , then we must divide the time by the same factor  $c$  (or equivalently multiply by  $1/c$ ). This is an example of inverse variation of two quantities. The statement "y varies inversely as x" means that: if  $x$  multiplied by some factor then  $y$  is multiplied by the reciprocal of that factor.
