Honda CX500 Turbo - Classic Japanese Motorcycles ...

Strengthened engine. The CX's crankcases were strong enough to be retained, but much of liquid-cooled engine was uprated. A stronger crankshaft, clutch and conrods, plus Honda's first production-specification forged pistons, all helped to keep it together when the turbo increased peak power from the standard CX500's 50bhp to the Turbo's 82bhp ...

Honda CX500 Turbo

According to Motorcycle Specs, the small cylinders required the world's smallest turbocharger, with 51mm rotors that spun at over 200,000 rpm. Thanks to the tiny turbo, the 498cc engine produced 82 horsepower, which got the bike up to 128 miles per hour. This was up from the base CX500's 50 horsepower.

1982 Honda Cx500 Turbo Motorcycles for sale

The CX500 was more of an example of Honda's engineering capabilities, as turbos are more ideally suited to large, multi-cylinder engines that give a smooth exhaust flow. The CX500 Turbo produced 82 bhp, well above the standard CX500's 50 bhp and was capable of incredible acceleration, but the turbo lag and step-down made it difficult to ride.

Honda CX500TC 1982 (C) parts lists and schematics

Some went out and bought a Honda CX500 Turbo. When it was introduced in 1982, the CX500 Turbo was — and still is — one of the most futuristic motorcycles ever made. It not only featured turbocharging — ramming extra fuel/air mix into the engine to increase horsepower — but also computer control of the turbocharging, fuel injection, ignition and numerous other advanced features.
