Shenyang J-15 - Wikipedia

The Nissan A series of internal combustion gasoline engines have been used in Datsun, Nissan and Premier brand vehicles. Displacements of this four-stroke engine family ranged from 1.0-liter to 1.5-liter and have been produced from 1967 to the present. It is a small-displacement four-cylinder straight engine. It uses a lightweight cast iron block and an aluminum cylinder head, with overhead

List of Nissan engines: Gasoline (Petrol) and Diesel

The Great Eastern Railway Class Y14 is a class of 0-6-0 steam locomotive. The LNER classified them J15. The Class Y14 was designed by T.W. Worsdell for both freight and passenger duties - a veritable 'maid of all work'. Introduced in July 1883, they were so successful that all the succeeding chief superintendents continued to build new batches down to 1913 with little design change, the final total being 289. During World War I, 43 of the engines served in France and Belgium.

Fits Nissan Datsun J15 engine kit 620 521 forklift pistons ...

A bit like night & day really, but if the small pushrod engine has an external aluminium oil pump, on the right side of the block near the front, driven by a horizontal shaft, then chances are that it's an A series engine. If it looks like an Austin A40 engine, if it has a cast iron head, then it's probably a J series engine.
