Continuing on "amp week," here is an amp that was actually a pretty decent amp despite the fact that it was solid state. These were made from '92-'94 from what I can tell and were replaced by the Fender Ultimate Chorus. It has built in chorus and channel switching with a distortion sound that's okay.

### The Ones That Got Away: Fender Ultra Chorus

Tried it out w/ cigar box guitars and it worked quite well. A lot of the hissy instruments I have sound good through this amp as well. I also own the fender 212r, which to me is almost identical to the ultimate chorus in terms of construction. So, I have 2 2x12 amps now, making it so I have a loud backup guitar amp no matter what.

Not an effects box with speakers, but a real guitar amp! Complete palette of digital effects like reverb, delay, chorus, and flange. It's all stereo, it's reliable, and it's toneful!

### 2-Button Footswitch: Channel-Chorus | Parts - Fender

hey all! Got a question about an Ultimate Chorus Amp that was given to me by a friend. When I turn it on it gives a loud pop/low-end squeak and then hums like it's not grounded. When I turn on the chorus it adds its effect to the hum. Then when I turn it off, it pops again. Can anyone tell me what might be wrong, and what it would take to fix it.

Buy it. I've had an Ultra Chorus since 92 - twin 12, 65 watts, stereo chorus - it is a very good clean Fender amp. It also handles effects well, on occasion I put a BK Butler Tube Works pre-amp in front of it and the combination of the Ultra Chorus and the tube pre-amp gives me many different sounds from clean to brown to dirty, even at at low volumes.

Hey guys, I have a fender ultimate chorus that suddenly developed a VERY bad hum on the overdrive channel, as in no sound except the hum, and in the clean there is almost a constant pop/crackle. In my research on the web I have seen that this is most likely a bad solder joint?
