Ford Expedition Transmission Slipping

"Slipping" is the sensation that your transmission isn't connected to your engine when you press the accelerator. This happens in manual transmission vehicles when the clutch wears out and loses grip intermittently.

How to Fix a Slipping Transmission in Your Car (Fluid Change)

In layman's terms, 'slipping' can be best described as having the transmission go into neutral, although it's in drive, and not move the vehicle no matter how much you step on the accelerator.

Transmission does not shift out of gear.
