Upon starting your vehicle, you may see some of these indicators light up as a routine check to verify functionality. These lights may simply be indicating a vehicle control setting, e.g., Front Fog Lamps On. If certain indicators were to remain illuminated while your engine is running, however, they could be alerting you to a serious condition.

Warning Lamps and Indicators - Ford Motor Company

An engine restart fixed it both times. My service mechanic had to use two different scanners before he could find the code to reset which I thought odd. He spent over 20 minutes checking codes. It was under statutory warranty so had Ford look at it for nearly three days but they couldn't replicate the problem.
