Engine: The plane came with a HAPI 75 Magnum engine - which is a conversion of a VW bug engine to an aircraft engine. HAPI went out of business in 1989. The Magnum 75's (94mm pistons with a 69mm stroke for 1914cc's) and 85's (94mm piston with a 78mm stroke for 2165cc's) using on Scat's Split cylinder heads were HAPI's last products.

Top 5 Antique Engine Startups - Good Feels

After considering engine options, I think I'll stick with the HAPI engine the plane came with. The Continental O-200 engine is clearly a more reliable and "real" airplane engine. Additionally, it is much more powerful, giving the KR2 fantastic performance of ~175mph cruise and 1200 feet per minute climb.

HAPI - Balance Restored Corte Madera

Introducing SH Engines! SH Engines has been in business for decades making helicopter engines as well as high performance racing engines and super reliable sport car engines for almost every major car maker around the world. These new aircraft engines are based on these learnings.

Hapi Magnum Engines

HAPI engines are Volkswagen auto engines converted to full or 1/2 VW aircraft engines by Homebuilt Aircraft Products, Inc. (H.A.P.I.), initially of Calexico, California and later of Eloy, Arizona. Although the firm preferred the H.A.P.I. abbreviation, the Compiler has chosen to use HAPI, as many others have done.

Subscribe to our new channel! <https://goo.gl/D7HHdY> There's something so wholesome about watching these antique engines starting up. Many of these machines were built over a hundred years ago.

Alternative engines (Book, 1998) [WorldCat.org]

The original engine weighed 147 pounds and the HAPI 60-2DM conversion installed weighed 158 lbs. The slight gain in weight is offset by a lot more convenience and the extra margin of safety that was provided by the dual ignition. The Cygnet design requires a light engine and cannot tolerate the weight of a heavy aircraft engine.
