The 1200 is a V-Twin, air-cooled two-cylinder engine with a displacement of 1201 cubic centimeter, a cylinder bore of 3.5 inches and a stroke of 3.812 inches. The four-stroke engine has two valves per cylinder, and an overhead-valve (OHV) configuration.

### **Harley Davidson: Twin Cam 96ci Engine Specs**

Harley-Davidson did not release a power rating for the engine, but, according to the NightRider website, an estimated power rating placed the output approximately between 70 and 80 horsepower. The torque rating was an impressive 85 foot-pounds at 3,000 rpm.

### **Milwaukee-Eight Engine | Harley-Davidson USA**

Harley-Davidson Twin Cam engines are motorcycle engines made by Harley-Davidson since 1998. Although these engines differed significantly from the Evolution engine, which in turn was derived from the series of single camshaft, overhead valve motors that were first released in 1936, they share a number of characteristics with nearly all previous Harley-Davidson engines. Both engines have two cylinders in a V-twin configuration at 45°, are air-cooled, and activate valves with push-rods. The ...
