It's the biggest, most powerful street-compliant performance engine Harley-Davidson has ever created. Built from the bottom up in Milwaukee, this street-tuned 131-cubic-inch Screamin' Eagle® Crate Engine is designed to run with a wide-open throttle at high engine speeds and provide instant passing power from cruising speed. Made for riders seeking maximum displacement, compression and flow, it delivers 131 ft-lb of torque to the rear wheel as soon as the throttle is cranked.

### **Harley Davidson Performance Parts - FeulingParts.com**

When Harley decided to change engines they added the complication of two cams and a cam chain and, in the case of the "B" motors, they put in a counterbalancer to smooth out the rigid mount Softail engines. S&S quickly came up with gear-driven cams to get rid of the pesky chains. We use gear drive cams in the 126 and 139 ORCAS. Heights/Dimensions
