A private branch exchange (PBX) is a telephone system within an enterprise that switches calls between users on local lines, while enabling all users to share a certain number of external phone lines. In contrast to a public switched telephone network (), the main purpose of a PBX is to save the cost of requiring a line for each user to the telephone company's central office.

### **Business telephone system - Wikipedia**

In Europe, several mutually incompatible mobile radio services were developed. In 1966 Norway had a system called OLT which was manually controlled. Finland's ARP, launched in 1971, was also manual as was the Swedish MTD. All were replaced by the automatic NMT, (Nordic Mobile Telephone) system in the early 1980s.. In July 1971 Readycall was introduced in London by Burndept after obtaining a ...
