I have all of the Engineering library CD's, and I have used them somewhat. Being a mechanical engineer, I have used a couple of the design sheets out of the mechanical engineering CD, but I could probably use more if I have the need. Like Phil said, they are standard equations that are found in most text books.

I can tell you that MathCAD can do far more than our firm requires. It is a great tool. And I am sure there are more efficient uses of the program's features. We tend to have tunnel vision when updating or developing a calculation. As a result we rely on previous calculation examples, when new methods may be available within the software.
