CropLife International | CropLife International

Laboratory studies have found many ways in which pulses and their many healthful compounds could provide anti-cancer activity. Resistant starch and fermentable types of dietary fiber support growth of healthful bacteria in the colon in animal studies.. Phenolic acids increase cells' antioxidant and anti-inflammatory defenses against damage that could lead to cancer in cell and animal studies.

4.1. Plant-Derived Protein (Pulses) On a global basis, plant based protein is of immense importance and there is significant interest in its ability to meet growing demand for protein from non-meat sources. Thus, one of the key reasons for an increase in demand for plant-based protein is due to favourable comparisons with meat-based proteins.
