Revit is BIM software widely used by architects, engineers, and contractors to create a unified model that all disciplines and trades can use to complete their work. Autodesk Revit was created to support BIM and not to replace BIM. Revit hosts the information that forms the model from which drawings and documents are derived.

Revit vs. AutoCAD: What's the difference? | Autodesk

The Learners Point center made me realize another angle of how to train people. It was my first training experience in Dubai, I liked it. I will recommend them for anyone if they need professional training in any new technologies. My training was an AWS solution architect and I can't wait to take the exam and get my certificate.

Learners Point

Unload the linked-in architectural project file from your MEP project file. Save and close your MEP project file. Open the architectural project file and link your MEP project file into it using the Manual - Center positioning option and place it somewhere near the architectural building. Rotate/move it into the appropriate position to correspond correctly with the architectural building.
