### **0.4 — Introduction to C++ development | Learn C++**

The benefit of contributing beyond age 65 while receiving a CPP retirement pension is that you will become eligible for a new monthly benefit known as a post-retirement benefit or PRB. Each year that you contribute to the CPP after starting your CPP retirement pension will generate an additional PRB, paid monthly for life.

### **Introduction To Data Structures In C++**

In the developer command prompt console window, enter the command `cl /P arguments filename.cpp`. For arguments, use the list of arguments you captured above. `filename.cpp` is the name of your repro source file. This command replicates the command line you used for the repro, but stops the compilation after the preprocessor pass.
