Swift User Guide

The SWIFT OTD Libraries for 2008 include a Generic OTD used to route SWIFT messages. The Generic OTD can be used to parse any valid SWIFT message, allowing you to unmarshal and read the message headers to determine the message type, while leaving the message data as a String. Messages can then be routed to the appropriate OTD for that message type.

the first time, it can be a bit daunting. To the untrained eye the whole SWIFT message structure can look like gobbledygook. But actually, there is a bit of a method to the madness. Whether you are receiving, processing or constructing an MT101 or an MT940 message it is important to what you're dealing with, and what needs to go where.

Standards releases | SWIFT

SWIFT message types are the format or schema used to send messages to financial institutions on the SWIFT (Society for Worldwide Interbank Financial Telecommunication) network. The original message types were developed by SWIFT and retrospectively made into an ISO standard, ISO 15022. This was later supplemented by a XML based version under ISO 20022
