SQL*Plus Substitution Variables - Oracle

Code language: SQL (Structured Query Language) (sql) In this syntax, e1, e2, ... en are scalar expressions that evaluate to scalar values. The COALESCE expression returns the first non-null expression. If all expressions evaluate to NULL, then the COALESCE expression return NULL;. Because the COALESCE is an expression, you can use it in any clause that accepts an expression such as SELECT ...

SQL - Oracle

The recommendation with writing joins is to use the ANSI style (the JOIN and ON keywords) rather than the Oracle style (the WHERE clause with (+) symbols). I've written about this before in my guide to joins in Oracle, and there are a few reasons for this:. In large queries, it's easy to forget to add a WHERE clause to join a table, causing unnecessary cartesian joins and incorrect results
