Now, Twin Cam engines are NOT my expertise but in all other Harley engines, the timing mark that you time the cam with has nothing to do with top dead center position of the crankshaft. There is a specific mark on the pinion gear that the cam has to be timed to or the timing will be incorrect.

### Harley Davidson Twin Cam Engine Problems? What To Do ...

Twin Cam engines use two piston oilers, one for each cylinder, to provide cooling oil to the pistons. Oil is sprayed through a very small orifice near the tip of the oiler and controlled by a check ball. Debris from worn spring-loaded tensioner pads can clog the oiler or hold the check ball open, reducing oil pressure and over-oiling the ...
