Both map and flatMap can be applied to a Stream<T> and they both return a Stream<R>.The difference is that the map operation produces one output value for each input value, whereas the flatMap operation produces an arbitrary number

(zero or more) values for each input value.. This is reflected in the arguments to each operation. The map operation takes a Function, which is called for each ...

Reading comprehension and vocabulary: what's the connection? - ReadOxford

As I understood a "bug", the word was taught in computer classes, and these classes taught me the history of the word. An old computer (which was very large, possibly filling most of a large room, and probably using vacuum tubes) had a failure. Investigation found the mechanical cause was from a moth.
